## SNAP-IN CABLE GLANDS WITH INNOVATIVE FIXING SYSTEM - "EZ" LINE

**Material:** body in Polyamide 6 UV resistant (plastic cable glands) / nickel-plated brass (metal cable glands), sealing and O-Ring in chloroprene.

**Colour:** light grey RAL 7035, dark grey RAL 7001, black RAL 9005 (plastic cable glands).

**Sealing:** -S (for lamellar clamping), -CP (multi-layered "onion" sealing).

**Operating temperature:** -20°C / +100°C (short term -30°C / +150°C)

**IP Protection:** IP 66 / IP 68, Type 4X (UL 50E).

**Flammability:** flame retardant and self-extinguishing UL94-V2.

**Standards and Certifications:** VDE (EN 62444), UL (UL 514B, CSA C22.2 Nr. 18.3-12 e 94.2-15), CSA (CSA C22.2), DNV (EN 62444).

Insert the  
snap-in  
cable gland...

..then push and turn to  
lock the cable gland on  
the wall.

For disassembling push  
the specific tool on the  
snap...

...and extract the cable  
gland from the hole.

- They do not require locknuts or threaded holes; they are fixed with a quick and easy snap fit.
- Innovative wall fixing system by PUSHING and TURNING clockwise the cable gland to lock it on the wall.
- Faster installation than a traditional cable gland.
- Lamellar clamping cable glands, manufactured according to DIN EN 62444/50262 and very performing both for strain relief and for IP protection.
- Available in 5 sizes, for mounting holes with diameter from 16 to 40 mm.
- For wall thickness: 0,5 - 4 mm.
- For disassembling use the specific SPI tool, available in 5 sizes and sold separately.
- On request: plastic cable glands in colours blue RAL 5015, white RAL 9003 or red RAL 3020.
