

PLASTIC CABLE BUSHINGS WITH CABLE LOCKING RING - "HEYCO" SERIES - ITEM: K 625-375

Codice EZ: request the code from our sales office, **PLASTIC codice Heyco:** 2068.

Material: polyamide 6/6.

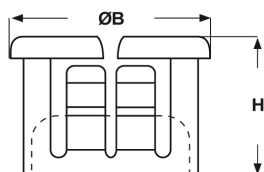

Color: black.

Use temperature: max +105°C

Flammability: flame retardant and self-extinguishing UL94-V2.

Features: these bushings have good resistance to chemicals and good electrical properties. Since the internal diameter of the bushing can be slightly enlarged to be able to insert cables or pipes and then restricted in the assembly, the result is a discreet locking and consequently an absorption to tractions. They offer valid electrical and mechanical protection to cables, ropes and pipes. Thanks to the fastening teeth, these bushings snap into place and adapt to the thickness of the frame up to a maximum indicated in the table.

On request: for quantity, they can be supplied in white or in other colors on sample.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
