

ADHESIVE BASES FOR TIES ITEM: ANP-2 NERO

Codice EZ: 310912

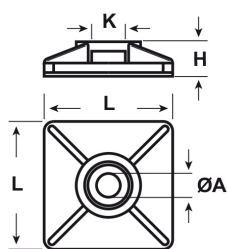

Material: ABS (ANP-1 and -2), polyamide 66 (ANP-4), polyamide (ANP-5).

Color: black, natural.

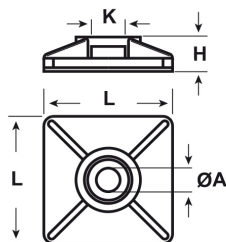

Use temperature: -10°C / +60°C (ANP-1 and -2), max +120°C (ANP-4), -40°C / +85°C (ANP-5)

Flammability: UL94-HB (ANP-1 and -2) flame retardant, UL94-V2 (ANP-4) flame retardant and self-extinguishing.

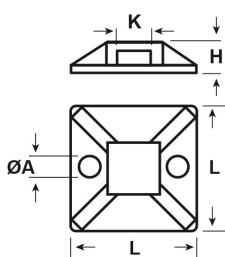

Features: the adhesive bases are used for fixing cables using cable ties. They are bidirectional, i.e. with the possibility of inserting the clamps both horizontally and vertically. For a better tearproof seal, it is possible to fix them further with screws (possibly with countersunk head). The ANP-5 base is the only one that does not have any screw holes, while the ANP-4 base has 2 side holes (see illustrations). To obtain an optimal seal it is recommended to stick the bases on clean and degreased surfaces.
