Features: cable ties can be used to tie cables but find application in many other fields of use. They have excellent resistance to oils, petrol, greases, aromatic solvents and good resistance to bases. They do not contain halogens. For outdoor use we recommend the black cable ties which, thanks to the additives of carbon black, have a higher resistance to UV rays. The length is to be understood including the head of the clamp.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
