

## CABLE GUIDE WITH TPE MEMBRANE ITEM: DG-TPE 9

**Codice EZ: 130676, CABLE SES-Sterling code: 01440010010.**

Material: Halogen-free TPE.

Color: black.

Use temperature: -50°C / +125°C

Features: during assembly, the membrane can be drilled according to the diameter of the cable, thus ensuring a good seal against dust.

Furthermore, the cable gland can also act as a plug to close the holes in the sheets, if the exact exit part of the cable is not known a priori.

TPE is a thermoplastic elastomer with excellent characteristics. It is similar to rubber, but is generally used in place of PVC compared to which it is softer, more elastic and has greater resistance to low and high temperatures.

The TPE cable glands have excellent resistance to low and high temperatures, have good resistance to water, ozone, atmospheric agents, acids, aqueous saline solutions, aliphatic and chlorinated solvents and detergents; they have a fair resistance to ketones, mineral oils and petrol and excellent resistance to aging. They are endowed with extreme flexibility and elasticity and good electrical properties. Furthermore, they do not contain halogens.

Flammability: UL94-HB flame retardant.

On request: cable glands in other colors for quantities.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
