

CABLE GUIDE WITH PVC MEMBRANE - "KLASSIC" SERIES -

ITEM: KMM 8

Codice EZ: 120077

Material: PVC.

Color: black.

Use temperature: -25°C / +60°C

Features: during assembly, the membrane can be drilled according to the diameter of the cable, thus ensuring a good seal against dust. Furthermore, the cable gland can also act as a plug to close the holes in the sheets, if the exact exit part of the cable is not known a priori. These grommets have good resistance to acids and mineral oils.

Flammability: flame retardant and self-extinguishing.

On request: cable glands in other colors for quantities. Furthermore, these cable glands can be made in a new compound similar to PVC for softness and flexibility but resistant up to a temperature of 110°C, 130°C or 150°C.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
