

CABLE GLANDS WITH MEMBRANE ON THE BOTTOM IN PVC - "PLIO" SERIES -

ITEM: DKF 11/18/22-3

Codice EZ: 129835, CABLE SES-Sterling code: 01070083010.

Material: PVC 9542.

Color: black.

Use temperature: -30°C / +70°C

Features: during assembly, the membrane can be drilled according to the diameter of the cable, thus ensuring a good seal against dust. Furthermore, the cable gland can also act as a plug to close the holes in the sheets, if the exact exit part of the cable is not known a priori. The membrane bottom gives the cable gland a better aesthetic impact than the cable gland with the central membrane. These cable glands have good resistance to low and high temperatures, good resistance to water, diluted acids, alkaline solutions, salts, ozone and UV rays; they have a good resistance to ketones, mineral oils, gasolines, esters and excellent resistance to aging. They have great softness and excellent dielectric properties.

Flammability: UL94-HB flame retardant.

On request: cable glands in other colors and in silicone for quantities.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.

ITEM	ØA mm	ØG mm	S mm	ØB mm	H mm	pack pcs.
