

CABLE GUIDE WITH MEMBRANE ON THE PVC BOTTOM - "EZ" SERIES -

Material: PVC.

Color: black.

Features: during assembly, the membrane can be drilled according to the diameter of the cable, thus ensuring a good seal against dust. Furthermore, the cable gland can also act as a plug to close the holes in the sheets, if the exact exit part of the cable is not known a priori. The membrane bottom gives the cable gland a better aesthetic impact than the cable gland with the central membrane.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
