

BRAIDS OF FLAT MASS HEADED IN TINNED COPPER

Material: tinned copper.

Color: silvered.

Features: copper braids are mainly used for grounding. Those in tinned copper have a greater resistance to bad weather and brackish air.

On request: they can be made with lengths and with a diameter of the end hole of your choice; they can be made with elementary wire $\varnothing$ of 0.1 mm or 0.2 mm; it is possible to combine braids and terminals in either raw or tinned copper.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.

ITEM	Ø elementary wire mm	section mm 2	L mm	terminal with eyelet width x length x thickness mm	Ø terminal hole mm	pack pcs.
