

BRAIDS OF ROUND MASS IN TINNED COPPER

Material: tinned copper.

Color: silvered.

Features: copper braids are mainly used for grounding. Those in tinned copper have a greater resistance to bad weather and brackish air. They are made with wires with Ø 0.1 mm or 0.2 mm and are packed in skeins.

On request: they are available both in lengths of your choice and with sections other than those shown in the table.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
