

"AERSTOP" RUBBER ADHESIVE GASKET ITEM: AERSTOP 14x50

Codice EZ: 178840

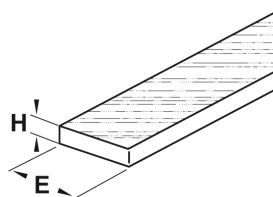

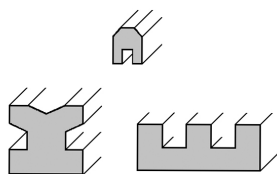

Material: EPDM + CR with adhesive.

Color: black.

Use temperature: -40°C/+80°C

Features: this product is made of closed cell foam rubber and is impermeable to both liquids and gases even under heavy stress. It is generally used as a gasket since it ensures a seal even on uneven or uneven surfaces. The Aerstop shows the following peculiarities: high elasticity and compressibility, strong elongation at break, effective electrical, thermal and acoustic insulation (in fact the gasket absorbs and does not transmit noise), excellent anti-vibration (effectively attenuates shocks and vibrations), lightness (it is also used for its buoyancy qualities), resistance to aging, UV rays, chemical agents, alkalis, diluted acids and ketone solvents. It is supplied in a rectangular section profile with an adhesive side and packaged in a 10 meter skein. On request: it can be supplied in rectangular or square section profiles in any size (including adhesive), in shaped profiles in various shapes and sizes to design, in profiles with round or tubular section, in die-cut gaskets in various shapes and sizes to design, in sheets with various sizes and thicknesses.
