

SILICONE SLEEVES - "SILAVIA" SERIES - ITEM: AS2K NATURALI

Codice EZ: request the code from our sales office, **SILICONE SES-Sterling code:** 0205001

Material: 2412 silicone, halogen-free.

Color: natural, clear, black, white, blue, green, yellow, brown, red or gray.

Use temperature: -80°C / +200°C

Features: the sleeves are very elastic and are the ideal solution for the insulation and protection of the ends of the conductors from dirt, corrosion and friction. They can also be used as a cable marking system. The silicone sleeves stand out for their resistance to high and low temperatures and for their excellent resistance to UV rays, ozone and aging. The assembly of the sleeves on the conductors is carried out using the 3-pronged pliers and is facilitated by the internal lubrication. The sleeves with internal diameter from 10 mm onwards are not internally lubricated; therefore, to facilitate the assembly of these on the calipers, it is advisable to use the lubricant LUB 2.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
