

SR 8R-200

ST 101A

BLOCCACAVI IN PLASTICA PER FORO APERTO QUADRANGOLARE - SERIE "HEYCO"

ITEM: ST 101A

Codice EZ: 148124, BLOCCACAVI codice Heyco: 1839.

Material: polyamide 6/6.

Color: black.

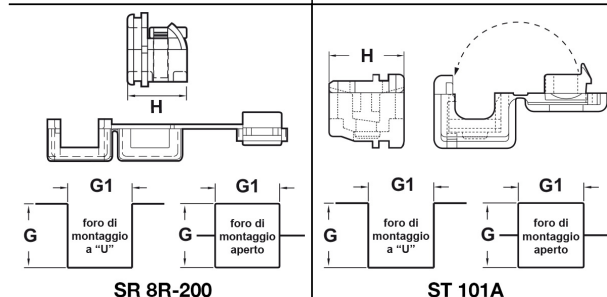

Use temperature: -18°C / +105°C

Flammability: flame retardant and self-extinguishing UL94-V2.

Regulations and Certifications: UR, CSA.

Features: these cable clamps have good chemical resistance and good electrical properties. They offer valid electrical and mechanical protection to the cables, absorbing the traction, thrust and torsion forces that can be exerted on the cables themselves. They anchor perfectly and, thanks to the rectangular shape, they absolutely cannot rotate. They appear aesthetically well given that, once installed in the structure, only the head of the cable clamp, with a very reduced thickness, remains visible from the outside. They are designed to be installed in open quadrangular mounting holes; in fact, they are not snapped onto the structure but slide them into the mounting hole. They are also distinguished by the advantage of being able to pre-assemble them on the cable (they clip on the cable) and then install them also at a later time or in a remote place, thus saving on installation costs. The SR 8R-200 cable clamp can also be used for bundles of cables (both flat and round up to a $\varnothing$ 15.2 max) and is pre-assembled on the cable by means of the integrated toothed collar. The ST 101A cable clamp is suitable for round cables. To plug unused quadrangular mounting holes, RP type quadrangular "DOUBLE" plugs are available. For the preassembly operation on the cable (cable clamp ST 101A) it is advisable to use our tools PINZA R or PRESSA ST; assembly in the structure, on the other hand, is done by hand without the aid of additional tools.

On request: for quantity, they can be supplied in white or in other colors on sample.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
