

BLOCCACAVI IN PLASTICA AD INNESTO RIAPRIBILI - SERIE "HEYCO"

Material: polyamide 6/6.

Color: black.

Use temperature: -18°C / +105°C

Flammability: flame retardant and self-extinguishing UL94-V2.

Regulations and Certifications: UR, CSA.

Features: these cable clamps have good chemical resistance and good electrical properties. They offer valid electrical and mechanical protection to the cables, absorbing the traction, thrust and torsion forces that can be exerted on the cables themselves. Regardless of the installation in the structure, these cable clamps can be pre-assembled on the cables thanks to the integrated toothed collar which can be easily reopened by means of the specific pliers PINZA 0054. They can be installed in round mounting holes (ØG), but if a hole is made having the shape indicated by us in the drawing (G1), the cable clamp will not be able to rotate. To plug the holes with this template, DD type "DOUBLE" plugs are available. Cable clamps can be used for both flat and round cables and also for cable bundles. Thanks to the fixing teeth, these cable clamps snap on without the use of tools and adapt to the thickness of the frame up to a maximum indicated in the table.

On request: for quantity, they can be supplied in white or in other colors on sample.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
