

PRE-INSULATED POINTS FOR EARTHING CABLES

ITEM: CED-TER 025 M

Codice EZ: request the code from our sales office

Material: tinned copper ferrules with polypropylene insulation.

Color: the color of the insulation varies according to the section of the conductor to be combined (see table).

Use temperature: max +105°C

Features: these ferrules are made of copper and electrolytically tinned to offer the best possible protection against corrosion. They are characterized by a funnel with larger dimensions and suitable for accommodating the short-circuit protection and grounding cables. The inside of the "EasyEntry" type ferrules facilitates the insertion of the cable eliminating the risk of bending the wires.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
