

tipologia di crimpaggio

PLIERS FOR INSULATED TERMINALS - "ELPRESS" SERIES -

Material: hardened steel body with plastic handle.

Features: these pliers are suitable for crimping pre-insulated terminals with a section from 0.14 to 2.5 mm². Very handy and compact, they are equipped with a ratchet device that guarantees optimal closure of the jaws and automatic reopening after crimping is complete. An emergency lever, in case of need, allows the reopening of the jaws before their total closure. They require minimal effort for each crimp. They are also suitable for left-handers. They have laser-marked beaks with the appropriate sections. They guarantee at least 50,000 crimps. These pliers are certified by Elpress which verifies their quality (force impressed on the crimp, precision of movement, reliability, etc.). Weight: 0.50 kg, length: 192 mm, width: 66 mm.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
