## PINZE PER FASTON E INNESTI CILINDRICI NON ISOLATI - SERIE "EZ" -

### ITEM: FRB 0505 F

Codice EZ: 438300

Material: steel body with plastic handle.

Features: these pliers are suitable for crimping fastons and non-insulated cylindrical couplings with a section from 0.25 to 6 mm<sup>2</sup>. The FRB 0505 F pliers are suitable for crimping Sub-D RS 232 contacts and non-insulated Pins with cross-section from 0.05 to 0.8 mm<sup>2</sup>. Very handy and compact, they are equipped with a ratchet device that guarantees optimal closure of the jaws and automatic reopening after crimping is complete. An emergency lever, in case of need, allows the reopening of the jaws before their total closure. They have beaks marked with the appropriate sections. They are particularly cheap.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
