

NON INSULATED FORK TERMINALS - "ELPRESS" SERIES -

ITEM: B 2553 G

Codice EZ: 429613

Material: tinned copper cable lugs (copper 99.95%).

Features: these cable lugs are made of copper and electrolytically tinned to offer the best possible protection against corrosion. During the manufacturing phase, the terminal collar is subjected to brazing and annealing treatments in order to allow perfect crimping at any point around the collar. To facilitate identification and/or inspection, the cable lugs are marked, where possible, with the maximum usable conductor section and with the metric size of the screw.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
