

NON-INSULATED SQUARE EYE TERMINALS - "ELPRESS" SERIES -

ITEM: KR 10-12

Codice EZ: request the code from our sales office

Material: tinned copper cable lugs (copper 99.95%).

Regulations and Certifications: c-UL-us.

Features: these cable lugs are made of copper and electrolytically tinned to offer the best possible protection against corrosion. They are subjected to annealing treatment and are distinguished from round eyelet terminals since these are made from a copper tube. The collar is equipped with an inspection hole for the correct positioning of the wires. To facilitate identification and/or inspection, the cable lugs are marked, where possible, with the maximum usable conductor section and with the metric size of the screw hole.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
