

NOT INSULATED HEAD-HEAD JOINTS - "ELPRESS" SERIES -

Material: joints in tinned copper (copper 99.95%).

Regulations and Certifications: c-UL-us.

Features: these couplings are made of copper and electrolytically tinned to offer the best possible protection against corrosion. During the manufacturing phase, the joints are subjected to the annealing treatment in order to allow a perfect crimping at any point. To facilitate identification and/or inspection, the joints are marked, where possible, with the maximum usable conductor section.

The drawing is indicative and the proportions may not correspond to the table or real dimensions.
